- Node JS

### Front-end

- React JS
- Javascript

### Data Base

- MYSQL

### Prototyping

- Figma

## Interests

- Web Development
- Artificial intelligence
- MERN stack

## Projects

### CarShowRoom

The project is about an E-commerce Platform for selling Car and buying cars

### IMS-system

IMS (Inventory Management System) is a comprehensive project designed for database courses. It serves as a platform for efficiently managing inventory records, built using Django, HTML, CSS, and JavaScript. The project encompasses features such as inventory record management, order creation, and a visually appealing user interface with customizable themes and button styles
